

JORENKU Triple-Iron

JORENKU Triple-Iron

Triple-Iron is a tasteful and effective iron supplement.

Piglets need iron to secure a sufficient high level of haemoglobin and not develop anemia. Studies show that the piglets only have some of their needs covered through the sow's milk, thus it is necessary to provide the piglets an extra supplement of iron.

Triple-Iron is based on three-component iron and contains i.a. vitamin C, which promotes the absorption of iron. Triple-Iron is composed so that it also acts as an electrolyte, providing a strong gastrointestinal system.

Triple-Iron is sprinkled on clean and dry floor where the sow has no direct access to it.

In cases where injected, a lower haemoglobin level is often seen in the last period before weaning. Here, Triple-Iron can profitably be used supplementary. Often, the piglets are injected at the age of 3-5 days, which in some cases can lead to arthritis. This risk is completely eliminated by the allocation of Triple-Iron, because it is allocated oral.

Three studies of Triple-Iron show, that by allocating Triple-Iron with the recommended dosage each piglet gets 1,000 mg iron.

Test result shows the following interval for Fe values

111-	73,8 %
101-110	16,7 %
91-100	7,1 %
81-90	2,4 %
71-80	0 %

As can be seen from the diagram on the next page, the desired level of haemoglobin and normal weight is achieved by assigning Triple-Iron, even if no injection is given.

Triple-Iron is available in buckets with 1 kg, 5 kg, and 10 kg and in bags with 20 kg.

JORENKU Triple-Iron

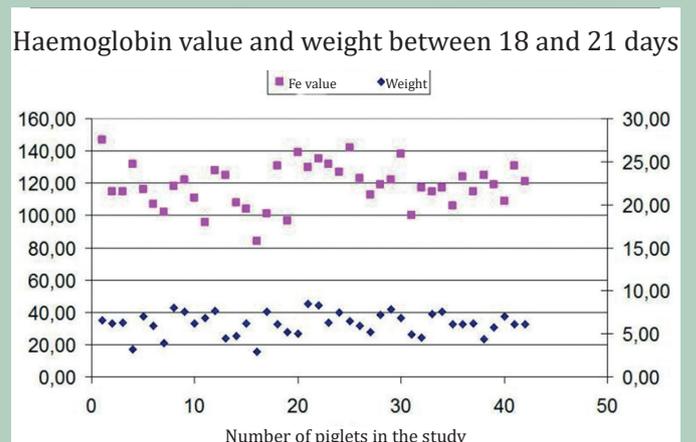

Triple-Iron Vitamin-rich supplement for piglets

- Effective
- Easy to dose
- Contains vitamin C
- Works like an electrolyte
- Tasty

Additives and vitamins	
Manganese	Sodium glutamate
Copper	Citric acid
Zinc	Propionic acid
Iodine	Vitamin A
Cobalt	Vitamin D ₃
Iron	Vitamin E
Iron oxide	Vitamin C

Product	Triple-Iron
Packaging	1 kg bucket 5 kg bucket 10 kg bucket 20 kg bag
Dosage	1 cup (50 g) corresponds to the dose for 15 piglets per day First allocation: 1 cup/litter every other day. Start on days 3-5 (3 times in total) Second allocation: 1 cup/litter every other day. Start on days 14-17 (3 times in total)

JORENKU Triple-Iron

Vitamin-rich iron supplement for piglets

Application:
 Supplement for piglets with the objective of covering piglets' iron needs beyond the product classes and dry sows and where it cannot be obtained by the sow.
 1 piglet corresponds to the dose for 12 piglets per day.
 1 piglet per entry at a pig. Start on day 5, 6 (1 liter in total).
 1 piglet per entry at a pig. Start on day 5, 6 (1 liter in total).

Ingredients	Substances per kg	Content
Wheat	10000	10000 g (100%)
Iron (as Fe)	4000	4000 g (40%)
Copper (as Cu)	800	800 g (8%)
Zinc (as Zn)	2000	2000 g (20%)
Manganese (as Mn)	200	200 g (2%)
Calcium (as Ca)	1000	1000 g (10%)
Phosphorus (as P)	1000	1000 g (10%)
Ascorbic acid (as C)	1000	1000 g (10%)
Choline (as Ch)	1000	1000 g (10%)
Iron (as Fe)	4000	4000 g (40%)
Copper (as Cu)	800	800 g (8%)
Zinc (as Zn)	2000	2000 g (20%)
Manganese (as Mn)	200	200 g (2%)
Calcium (as Ca)	1000	1000 g (10%)
Phosphorus (as P)	1000	1000 g (10%)
Ascorbic acid (as C)	1000	1000 g (10%)
Choline (as Ch)	1000	1000 g (10%)
Iron (as Fe)	4000	4000 g (40%)
Copper (as Cu)	800	800 g (8%)
Zinc (as Zn)	2000	2000 g (20%)
Manganese (as Mn)	200	200 g (2%)
Calcium (as Ca)	1000	1000 g (10%)
Phosphorus (as P)	1000	1000 g (10%)
Ascorbic acid (as C)	1000	1000 g (10%)
Choline (as Ch)	1000	1000 g (10%)
